

REMOTE PARTNER PROGRAM

Let us show you what an MSP/MSSP can do for your IT

The Program

Pioneer-360's Remote Partner Program gives you all of the Security and Compliance benefits of a Managed Service Security Provider. This unique program allows you the freedom to maintain your daily IT practices, while adding an additional layer of security to your network and meeting additional compliance regulations. With our Remote Partner Program, you will get our advanced Security Suite. From end point protection to patching and anti-virus, from vulnerability scanning to SIEM, our Security Suite is catered to the Financial Industry's needs. Pioneer-360 catches and prevents cyber-crime activity so that you can rest easy knowing your network and your data are safe in our hands.

We only use the top-rated third-party vendors for our Remote Partner Program, ensuring high quality results from anywhere. This program was designed with the Financial Industry in mind, knowing the hurdles you face in your day-to-day IT infrastructure. With these third-party vendors, you can be assured that while you take care of your business, Pioneer-360 will be taking care of your Security and Compliance needs.

- Nable is the most advanced RMM platform available that allows us to have the most comprehensive view of your network, including Patching, and Third-Party Patching.
- Bitdefender is the number one Anti-Virus solution with behavioral analysis.
- Nessus allows us to perform monthly vulnerability scanning with remediation and reporting.
- Watchguard routing with full security suites allows IDS/IPS/TDR at all locations. Your Firewall will be fully managed, licensed, and patched by Pioneer-360 for optimal performance, security, and compliance.
- We use award winning Perch SIEM, developed for banking with SOC eyes on your infrastructure 24/7/365.
- Monthly reporting of IDS/IPS/TDR, vulnerability, AV, Patching, and SIEM customized to you and your business' compliance regulations.

About Pioneer-360

Pioneer-360 is a full-service IT and Telecommunications firm located in Ohio. From CIO level services to Network Administration, Pioneer-360 prioritizes a proactive response to IT. We work with our clients to build the right IT and Telecommunication solutions for their business and their industry. For over 30 years, we have been working with banks, municipalities, and other large-scale security focused organizations and we are experts in the security and compliance field.

Our Advantages

We are currently in the process of obtaining our SOC 2 Type 2 Compliance. Obtaining this compliance allows us to give our clients the best service we can. Pioneer-360 holds itself and its employees to the same compliance regulations that our clients are forced to uphold. Fully immersing ourselves into the Security and Compliance world gives us a better understanding of the needs our clients have and equips us with the knowledge necessary to serve you. Your daily IT Staff already does so much from maintaining your network infrastructure, to the constant help desk calls that roll in. Help them by taking something off their plate and let the Security and Compliance experts handle the rest.

Meet our **Third Party Vendors**

N-ABLE

- Nable will be your RMM, and it is the most advanced RMM platform available.
- With out-of-the-box remote monitoring, management, patching, and automation, it's easier than ever to support, manage, and protect our customers with N-able.

PERCH

- Perch is an award winning SIEM developed with the Financial Industry in mind by financial industry professionals.
- Perch allows us to drop deployment time from months to minutes with cloud-based SIEM. Access logs directly within Perch, while our SOC monitors them alongside network data, escalating threats straight to you.

Bitdefender®

- Bitdefender is the number one anti-virus solution with behavioral analysis.
- Bitdefender is a cybersecurity leader delivering best-in-class threat prevention, detection, and response solutions worldwide.

WatchGuard®

- We use Watchguard routers as our first line of defense for optimal performance, security, and compliance.
- WatchGuard is a comprehensive advanced network security platform that puts us back in charge of your network with widely deployable, enterprise-grade security and threat visibility tools suitable for any organization, regardless of size, or complexity.

Nessus®

- Nessus provides monthly vulnerability scanning with remediation reporting and keeps your environment protected and clean.
- Nessus has the industry's lowest false positive rate with six-sigma accuracy. They constantly work to improve their software, keeping it as the number one solution for vulnerability assessment.
