

REMOTE PARTNER PROGRAM

NOW WITH ZERO TRUST

Let us show you what an MSP / MSSP can do for your IT

The Program

Pioneer-360's Remote Partner Program compliments your internal IT with a perfectly balanced mix of technicians and tools; our highly skilled NOC and SOC team of engineers has the perfect toolset for any financial organization with our award-winning Security Suite. From end point protection to patching and anti-virus, from vulnerability scanning to SIEM, our Security Suite with our talented engineers is designed for and catered to compliant-heavy industries. Pioneer-360's Remote Partner Program catches and prevents cybercrime activity so that you can rest easy knowing your network and your data are safe.

We only use the top-rated third-party vendors for our Remote Partner Program, ensuring high quality results from anywhere. This program was designed with the Financial Industry in mind, knowing the hurdles you face in your day-to-day IT infrastructure. With these third-party vendors, you can be assured that while you take care of your business, Pioneer-360 will be taking care of your Security and Compliance needs.

- Nable is the most advanced RMM platform available that allows us to have the most comprehensive view of your network, including Patching, and Third-Party Patching.
- Bitdefender is the number one Anti-Virus solution with behavioral analysis.
- Nessus allows us to perform monthly vulnerability scanning with remediation and reporting.
- Watchguard routing with full security suites allows IDS/IPS/TDR at all locations. Your Firewall will be fully managed, licensed, and patched by Pioneer-360 for optimal performance, security, and compliance.
- We use award winning Perch SIEM, developed for banking with SOC eyes on your infrastructure 24/7/365.
- Through Threatlocker, a strict identity verification process will take place across your organization and devices, Protecting you, your organization, and your employees from advanced threats.

About Pioneer-360

Pioneer-360 is a SOC2 Type II Certified MSP / MSSP located in Ohio that provides high-end managed and proactive IT Security & Compliance solutions. We work with our clients to build the right IT and Telecommunication solutions for their business and their industry. For over 30 years, we have been working with banks, municipalities, and other large-scale security regulated organizations and we are experts in the security and compliance field.

Our Advantages

We recently achieved our SOC 2 Type II Compliance. Obtaining this compliance allows us to give our clients the best service we can. Pioneer-360 holds itself and its employees to the same compliance regulations that our clients are forced to uphold. Fully immersing ourselves into the Security and Compliance world gives us a better understanding of the needs our clients have and equips us with the knowledge necessary to serve you. Your daily IT Staff already does so much from maintaining your network infrastructure, to the constant help desk calls that roll in. Help them by taking something off their plate and let the Security and Compliance experts handle the rest.

Meet our **Third Party Vendors**

N-ABLE

- Nable will be your RMM, and it is the most advanced RMM platform available.
- With out-of-the-box remote monitoring, management, patching, and automation, it's easier than ever to support, manage, and protect our customers with N-able.

PERCH

- Perch is an award winning SIEM developed with the Financial Industry in mind by financial industry professionals.
- Perch allows us to drop deployment time with cloud-based SIEM. Access logs directly within Perch, while our SOC monitors them alongside network data, escalating threats straight to you.

Bitdefender®

- Bitdefender is the number one anti-virus solution with behavioral analysis.
- Bitdefender is a cybersecurity leader delivering best-in-class threat prevention, detection, and response solutions worldwide.

WatchGuard

- We use Watchguard routers as our first line of defense for optimal performance, security, and compliance.
- WatchGuard is a comprehensive advanced network security platform that puts us back in charge of your network with widely deployable, enterprise-grade security and threat visibility tools suitable for any organization, regardless of size, or complexity.

Nessus®

- Nessus provides monthly vulnerability scanning with remediation reporting and keeps your environment protected and clean.
- Nessus has the industry's lowest false positive rate with six-sigma accuracy. They constantly work to improve their software, keeping it as the number one solution for vulnerability assessment.

THREATLOCKER

- Take your network security to the next level with our newly added Zero Trust. Through Threatlocker, a strict identity verification process will take place across your organization and devices, Protecting you, your organization, and your employees from advanced threats.
- Threatlocker prevents Malware, Data Theft, Internal IT Disputes, and Remote Access Attacks.
