

PIONEER-360

MSP/MSSP

SIEM / Managed SOC

SIEM gives access to a big-picture view allowing threats to be detected before they disrupt business.

Zero Trust Architecture

Maximize security within your organization by implementing a Zero Trust architecture - restricting access to your network.

Vulnerability Scanning

Discover, analyze, and report any found vulnerabilities or flaws within your IT environment.

WHAT IS A MANAGED SECURITY SERVICE PROVIDER (MSSP)?

As a Managed Security Service Provider, Pioneer-360's focus is on more security centric IT consulting services, providing security structure within your organization and proactively recognizing security events to minimize your risk profile. MSSPs monitor and manage security systems and devices, respond to security incidents, and provide guidance on security strategy and compliance.

WHY DO I NEED AN MSSP?

- Pioneer-360's SOC 2 Type II Certification proves that we uphold ourselves to the highest security and compliance regulations.
- Expand your IT Staff with our 24/7 SOC Team.
- Around the clock threat detection and security protection for your organization.
- Optimize your security stack with Pioneer-360's industry-leading toolsets.
- Rapid incident response can help your organization quickly identify and mitigate security events.
